GREEN FLEX

100% Vegan Joint Care

Joint protection: bones and cartilage

With organic turmeric

Vegan, gluten and lactose free

Green Flex brings a unique combination of ingredients that has been formulated to improve the production of collagen, essential to regenerate bones and cartilage, and also to prevent and reduce pain associated with swelling and wear.

It's optimal at any stage in life, whether you are young and want your joints to sustain your physical activity, or your joints have started to show they need care.

Finding a joint protector not from an animal source is not an easy task. That's why Weider is always searching for new ways to satisfy the needs of people who want to stay healthy and also take into account their principles. So we wish to make it easy for everyone.

Usually the ingredients used in joint care products come from animal sources, but if we have chosen our ingredients carefully so that to make Green Flex vegan, competitive and

INGREDIENTS

- **Organic turmeric:** Turmeric is traditionally known for its anti-inflammatory effect. The fact that it's organic guarantees its quality and purity.
- **Glucosamine sulfate:** It is involved in cartilage growth and repair. Its deficit is associated with the onset of pain, especially in athletes with major joint wear.
- **MSM (methylsulfonylmethane):** It is involved in collagen fiber growth and works as an antioxidant favoring tissue regeneration.
- **Olive fruit extract (Osteolive):** This innovative ingredient from Spain supplies maslinic acid which is backed by studies related with modulation and inflammation diminishing.
- **Black pepper extract (BioPerine):** Its main active principle is piperine which increases the absorption and bioavailability of turmeric.
- **Vitamin C:** Vitamin C contribute to the normal growth of collagen and

Green Flex is also an ideal supplement if you are a celiac or are allergic or intolerant to lactose.
